Call 860-445-0334

## CONTACTS:

John McCarty, N.E. & Ohio  
John Shannon, S.E.  
John McDonnell, N.W.

RPS has the experience, technology, tools and equipment to *immediately* support radioactive waste **exhumation, examination, volume reduction and repackaging** projects funded by the American Recovery and Reinvestment Act. We are an experienced, value added supplier to the DoE, where we have worked for 30 years delivering the engineering and equipment that will **put people to work**. Let us help with your accelerated cleanup projects.

**860-445-0334**

## DOE WASTE PROJECTS

### INL– Waste Exhumation

PIT 9—“Retrieval Confinement Structure” Seismically qualified building provided a high integrity contamination containment during radioactive waste excavation and sorting operations.

### ORNL ENERGX - TRU Waste Repackaging

Box breakdown area for characterization, initial sorting and processing of boxed and large component Transuranic and high-alpha contaminated materials.

### Nevada Test Site - Waste Identification & Repack

Primary (glovebox) and secondary (seismic building) contamination containment systems for processing Contact Handled waste. Transuranic waste contained in 55 gallon drums was opened, inspected, sorted and repacked to meet the Waste Isolation Pilot Plant (WIPP) Waste Acceptance Criteria (WAC).
